

THE MOG's SECURITY CREDIT RESERVE

The Security Credit Reserve is created by the agreement with the B-Corps that agree to accept GOODS for 2% of their sales. The value proportional to this amount of sales is deposited as a security in the B-Bank, creating a product-ballast for the emission of GOODS. These B-Corps will have exclusive access to the currency exchange protocol where they can change their GOODS by dollars or any other fiat currency.

VIRTUOUS VALUE LOOP

The value created by the new economy will organically grow leveraging companies sales and returning by the customers as investments to the fund that will promote new B-Corps scaling the platform exponentially in a virtuous values loop.
